

# EVERY BEAUTIFUL ROOM...

Starts with a picture in someone's mind.

## Getting Started with your beautiful room is easy with Statewide Cabinets.

- 1) Bring in any pictures of ideas that you may have.
- 2) If you are coming in before we have measured, try to take some measurements of the back walls. Making note of where the plumbing is, where appliances are and if there is a window. These do not have to be exact as we will measure before you place your order.
- 3) Think about your storage needs so we can discuss organization for your new kitchen. Make a list of cooking tools that you may use that need to be stored as well as food items.
- 4) Think about your wood choice.  
Oak: strong open grained wood  
Maple : strong closed grained wood, occasionally contains mineral streaks  
Birch: Medium hardwood with fine moderate grain  
Cherry: Multi-colored hardwood, small knots/ pin holes  
Hickory: Hickory is a strong grained wood and is common to see doors that will range in color from light to a deep brown, lots of wood variations
- 5) Think about your door style choices: traditional, contemporary or casual looks.
- 6) Have you selected appliances or know the type you are looking for? Will you be changing flooring? If not, your new kitchen layout will need to match the existing footprint.
- 7) Think about your countertop material. Laminate is the least expensive, Granite requires sealing periodically, Quartz countertops are maintenance free, Solid surface countertops require routine maintenance .
- 8) Some cabinet styles require hardware, do you like handles or knobs or a mixture, or do you prefer a cabinet without handles?
- 9) Establish a budget for your project, include your appliances, flooring, cabinetry, painting plumbing and electrical needs.
- 10) Establish a time frame. We have cabinets that are available from 2 -6 weeks depending on the brand.

Finally, bring in this getting started page and receive (1) free cutlery divider with your kitchen purchase!
